STEP ONE

- Lay out all your glasses in a row

STEP TWO

- Fill the first glass with a little bit of water. (We did about 3/4 a cup)

STEP THREE

- For the next glass, add a little more water. (We used about one cup)

STEP FOUR

- Continue with the same process down the line until you get to the end.

STEP SIX

- Take your spoon and GENTLY tap the side of each glass to hear the different sounds. You should notice, the more water in the cup, the lower the pitch.

- Try out different types of glasses and liquids to see how it affects the sound!
