+ Falcon SZ Series Door

— L Series Door

The L Series is designed to meet the broadest architectural requirements with premium construction, offering superior strength, stability and performance.

Continuous bonding of laminate core to steel face sheets provides an attractive, flat surface, making the L Series doors ideal for interior and exterior applications. Steelcraft L20, L18, and L16 all meet architectural requirements for full flush doors, while the L14 flush doors provide the best choice for maximum-duty full flush doors.

L Series doors are 1-3/4" (45mm) thick and offer a wide range of specifiable options covering sizes, core material, glass light designs, optional edge constructions and mechanical and electrical hardware preparations. Tested both internal and through certified third parties these doors provide the necessary performance to meet the broadest of opening needs.
